The Manager, Oriental Book Agency, 15 Shakrawar, Poona City.

The Manager, The International Book Service, Booksellers, Publishers and News Agents, Deccan Gymkhana Colony, 4 Poona.

The Manager, Burma Book Club, Ltd., 64 Phayre Street, P. B. No. 1068, Rangoon.

TRIENNIAL REPORT

OF

CIVIL HOSPITALS AND DISPENSARIES

OF THE

UNITED PROVINCES

FOR THE YEARS 1938–40

BY

COLONEL T. C. BOYD, M.R.C.P., F.R.C.S.I., K.H.S., D.P.H., I.M.S.,
Inspector General of Civil Hospitals, United Provinces

ALLAHABAD:
SUPERINTENDENT, PRINTING AND STATIONERY, UNITED PROVINCES, INDIA
1942

No. 16263/B

FROM

COLONEL T. C. BOYD, M.R.C.P., F.R.C.S.I., K.H.S., D.P.H., I.M.S.,
INSPECTOR GENERAL OF CIVIL HOSPITALS,
UNITED PROVINCES.

TO

THE SECRETARY TO GOVERNMENT,
UNITED PROVINCES.
MEDICAL DEPARTMENT.

Dated Lucknow, the 12th August, 1941.

SIR,

I HAVE the honour to submit the triennial report on the working of civil hospitals and dispensaries in the United Provinces for the years 1938, 1939 and 1940 together with the prescribed statistical returns—statements A to G.

2. The department was under the administration of the following Inspector Generals during the triennium: **Administration.**

Colonel J. A. S. Phillips, I.M.S., from 1st January, 1938 to 9th June, 1939.

Colonel T. C. Boyd, I.M.S., from 10th June, 1939, till the end of the triennium.

3. The cadre of the European and Indian I.M.S. Civil Surgeons remained unaffected during the triennium though seven I.M.S. officers have been recalled to Military duty since the beginning of the War. **Personnel (I.M.S. Officers).**

The cadre of the Provincial Medical Service Civil Surgeons also remained the same. **(P.M.S. Officers).**

The cadre of the Provincial Medical Service officers was increased by two, i.e. from 99 to 101 during the triennium due to the expansion of the Ursula Horsman Memorial Hospital, Cawnpore and the raising of the status of the Nagina Dispensary, district Bijnor from a P.S.M.S. to P.M.S. charge.

The services of two Provincial Medical Service officers were placed at the disposal of the Government of India, Defence Department, for War purposes.

The Public Service Commission selected 12 candidates during the year 1940 for recruitment to the Provincial Medical Service all of whom were appointed. Ten Provincial Medical Service officers were temporarily deputed to the new Agra Medical College for teaching duties.

The cadre of Provincial Subordinate Medical Service officers was reduced from 344 to 340 during the triennium. Forty-five Provincial **(P.S.M.S. Officers).**

Subordinate Medical Service officers in the first 10 years of their service joined Military duty from 1st July to 1st December, 1940, and one Provincial Subordinate Medical Service officer holding the M.B.B.S. degree was granted an Emergency Commission in the Indian Medical Service.

Statement "A." Number of hospitals and dispensaries.

4. At the beginning of the triennium there were 708 both rural and urban dispensaries, their number has been increased by 58 making a total now of 766 at the close of the triennium. The comparative figures for the triennium are noted below:

Year	Number of dispensaries		
	Rural	Urban	Total
1938 (1st January)	387	321	708
1939 (31st December)	440	326	766
1940 (31st December)	439	327	766

Ninety-eight new dispensaries were opened, 26 dispensaries were closed down and 14 dispensaries were transferred during the period under report.

Statement "B." Distribution of medical personnel.

5. The statement below shows the number of medical personnel in various institutions throughout the province. Comparative figures for the two triennia are:

Year	Total number of medical personnel
1935	2,508
1936	2,586
1937	2,685
1938	2,836
1939	2,965
1940	2,828

They consisted of Indian Medical Service, Women's Medical Service, Provincial Medical Service, Indian Medical Department, Provincial Subordinate Medical Service, Graduates and Licentiates both paid and honorary Lady Assistant and sub-assistant surgeons, compounders, nurses, midwives and *dais*.

6. *In-door patients*—The number of in-door patients treated at the State-Public (Provincialized hospitals under the Medical Department) State-Special (Government hospitals run by the Police, Jail, Forest, Canal Departments, etc.) local fund (Municipal, District and Cantonment Board hospitals and dispensaries), Private-aided and Non-aided dispensaries during the triennium were 475,355 as compared to 397,885 of the previous triennium. Statement "C." Number of in-door and out-door patients treated.

Out-door patients—The number of out-door patients treated during the triennium were 26,852,218 against 23,972,158 of the last triennium.

The comparative figures of patients treated during the two triennia are given below :

Year	Number of patients treated	
	In-door	Out-door
1935	127,844	7,509,951
1936	133,140	8,191,580
1937	136,901	8,270,627
1938	154,131	8,631,065
1939	159,466	9,149,868
1940	161,758	9,071,285

These figures to some extent indicate the utilization of Western medicines in the province. It may be noted that it is not very vigorous and certainly is not as rapid as it should be.

7. The statement shows that the number of beds available together with the various diseases treated and the deaths, both in the in-door and out-door departments of the several classes of medical institutions in the provinces. The total number of beds available at the beginning of the triennium (1938) was 9,672 but it increased to 10,090 at the close of the triennium (1940) consisting of 6,643 male and 3,447 female beds; or 1 bed to 5,000 of population (approximately) an index which shows the deficiency to be made good in this respect. (Japan allows 1·5 bed per 1,000 of population while Sweden allows as high as 5·8.) Statement "D." Number of beds available and geographical distribution of diseases.

The total number of in-door and out-door patients treated during the triennium were 32,558,703 against 29,409,350 of the last triennium. The number of male and female patients treated during the triennium under report were 21,933,441 and 10,625,262 respectively.

A compartive statement of the number of cases treated for some of the principal diseases and the number of their deaths, during the triennium is shown below :

Disease	1938		1939		1940	
	Treated	Deaths	Treated	Deaths	Treated	Deaths
Cholera	14,022	387	5,478	198	4,861	309
Dysentery (Amoebic) ..	111,069	137	118,124	114	111,276	101
" (Bacillary) ..	78,342	134	83,079	114	74,214	87
Diarrhoea	188,689	267	209,971	177	207,504	190
Enteric Fever	11,671	145	13,137	151	12,506	115
Kala Azar	995	9	540	4	808	7
Leprosy	10,281	13	10,265	20	10,976	17
Malaria	1,068,949	137	1,163,776	123	1,167,559	102
Meningococcal infection ..	324	60	423	73	337	71
Pneumonia	31,178	784	30,209	724	30,467	603
Smallpox	975	47	1,233	54	1,717	76
T. B of lungs	25,833	315	24,404	344	24,251	282
Pyrexia of uncertain origin and other diseases due to infection.	266,972	320	296,735	327	354,866	350
Tumours malignant, mouth	1,188	11	794	17	844	16
Oesophagus and Stomach. ..	657	8	272	14	184	10
Intestines ..	412	4	254	3	112	9
Rectum.. ..	155	6	148	5	146	5
Breast	708	7	677	9	830	6
Tumours malignant Uterus	2,273	27	1,395	20	1,528	12
" Penis ..	337	3	341	6	301	2
" Skins ..	799	1	805	8	5,507	2
" Others ..	3,422	45	3,175	41	2,189	41
Trachoma	242,755	2	271,858	..	250,788	1
Glaucoma	11,033	..	10,573	..	10,608	..
Cataract	39.122	3	39,517	5	42,274	1

Disease	1938		1939		1940	
	Treated	Deaths	Treated	Deaths	Treated	Deaths
Diabetes	3,021	24	2,527	29	2,507	24
Hydrocele	13,480	21	13,486	8	11,956	7
Nephritis	7,845	112	11,009	109	11,522	124
Stone in the bladder ..	3,770	67	4,431	75	4,472	76
Diseases of the respiratory system other than pneumonia and T. B.	766,619	264	781,956	206	784,524	225
Liver abscess	1,383	27	1,557	27	956	14

The large incidence and death rate from preventable diseases is worthy of note.

The following cases of Labour, normal and abnormal, were also treated during the triennium :

—	1938		1939		1940	
	Treated	Deaths	Treated	Deaths	Treated	Deaths
Labour (normal) ..	7,770	64	9,959	36	9,641	68
Labour (abnormal) ..	3,946	264	4,661	306	4,568	282

8. The number of surgical operations performed in the hospitals and dispensaries during the triennium 1938—40 was 1,214,240 as against 1,059,065 in the previous triennium. Statement "E." Surgical operations.

9. The total income of the State-Public and Special Local Fund and Private-aided hospitals and dispensaries during the triennium was Rs.1,28,74,607 as compared to Rs.1,21,80,480 of the previous triennium 1935—37. The total expenditure was Rs.1,05,52,602 against Rs.10,092,991 of the last triennium. The average cost of diet per in-patient per annum dieted from dispensary and Government funds for the year 1940 was Rs.4-3-11 as compared to Rs.4-14-7 in 1939. Statement "F." Financial statement.

10. On 31st December, 1940, the invested capital stood at Rs.23,01,351-11-10 as compared to Rs.22,72,597-5-10 at the end of the previous triennium. During the triennium the following transactions took place : Statement "G." Invested capital.

	Rs.	a.	p.
Investments	50,208	15	8
Securities sold	16,073	12	5
Deposits withdrawn	51,964	13	8

Income from hospital fees. 11. The total amount realized on account of rent of wards, operations fees, sale of medicines, and miscellaneous receipts during the triennium was Rs.7,73,188 against Rs.5,26,986 in the preceding triennium.

King George's Medical College. 12. During the triennium 152 admissions were made against 147 of the preceding triennium. The number of students admitted in each year is given below:

August, 1938	50
,, 1939	50
,, 1940	52
Total ..	152

The number on the rolls on the 31st December, 1938, 1939 and 1940 were respectively 275, 275 and 283.

Post-Graduate study of P.M.S. Officers. 13. As usual 10 Provincial Medical Service officers were deputed during 1938, 1939 and 1940 to attend the post-graduate course at the King George's Medical College, Lucknow, for a period of three months. They were however, exempted from appearing in the Examination.

King George's Hospital, Lucknow. 14. The hospital has an accommodation of 281 beds. The number of in-door and out-door patients treated during the triennium were as follows:

——	1938	1939	1940	Total
In-door patients ..	4,004	5,378	5,222	14,604
Out-door ,, ..	71,516	67,663	67,960	207,139

The paucity of beds in the different sections is acutely felt and many patients have to be refused admission.. In the year 1940, legal steps were taken against certain persons who did not pay their hospital dues for staying in the private and cottage wards.

Government have appointed an officer to look into the financial affairs of the hospital and to suggest improvements in respect of nursing staff accommodation and equipment, etc. It is expected that after considering this report this hospital will be put to work on a more satisfactory basis.

Queen Mary's Hospital. 15. The number of beds available is 56. The following figures show the number of cases treated:

Patients	1938	1939	1940	Total
In-door patients ..	1,594	1,683	1,639	4,916
Out-door ,, ..	17,599	17,857	17,820	53,276
Labour cases	373	411	385	1,169

It is threatened that if the students cannot conduct the prescribed number of labour cases, i.e. 20 per student, the medical council of India will withdraw the recognition of the Lucknow Medical degrees. Efforts are therefore being made to improve the hospital accommodation or make some other arrangements to attract the required number of labour cases. Proposals are before Government for consideration.

Further details concerning these hospitals, viz. King George's and Queen Mary's are published in the Annual Report of the Lucknow University separately.

Medical College, Agra.

16. The Medical School, Agra, was converted into a Medical College for teaching students for the M.B.B.S. standard and has now been affiliated to the Agra University. The minimum qualification for admissions to the College has been raised to the Intermediate in Science Medical group and before admissions are made, the candidates are required to appear in a pre-medical test and are admitted in the order of passing the examination. The charges of the hostel and examination fee, tuition fee, etc. have been simultaneously increased. A certain number of seats have been earmarked for lady students and students from neighbouring places, like Delhi and Rajputana.

Women's Medical School, Agra.

17. The school was closed down during the year 1940 but students remaining in the final class were allowed to continue their studies. After their examination in October, 1941, it will be finally abolished.

Full report about the School and College is published separately.

United Provinces State Medical Faculty.

18. The office of the President, during the triennium was held by Colonel Phillips, and later by myself, as usual the Faculty held two ordinary meetings and conducted the L.S.M.F., L.P.H., Nurses, Midwives and Assistant Midwives Examination.

In addition to the I Standard Nurses Examinations the Faculty have introduced a II standard, the preliminary educational qualifications for which are 6th class passed of an Anglo-Vernacular School or its equivalent or VI standard passed of an English School. The educational qualifications for standard I have been revised and now are VIII standard passed of an English School or 8th class passed of an Anglo-Vernacular school. These students have the option of taking the training and examinations either in English, Urdu or Hindi.

The faculty formulated a revised scheme for the Health Visitors course which has received the sanction of Government. A scheme for the training and examination of compounders has also been formulated and is under consideration of Government.

The syllabus for the Midwifery examination has also been revised on more up-to-date lines.

United Provinces Nurses' and Midwives, Council.

19. The Council held two ordinary meetings. As it has come to the notice of the Council that there is no proper supervision and control over midwifery practice of indigenous *dais*, the Council has submitted

model by-laws to Government for approval which are under considera tion. The question of establishing reciprocity of registration with the Nurses Councils of the Punjab Bombay and Burma is also under the consideration of the Council.

The following number of persons were registered during the year 1940 only :

Nurses	30
Midwives	11
Assistant Midwives	138
Health Visitors	1

United Provinces Medical Council.

20. Two ordinary meetings of the Council were held during the year 1940. One hundred and seventy-five persons were registered. The Council recommended to Government that *vaids* and *hakims* acquiring diplomas from the Board of Indian Medicines, should not be given a certificate of proficiency in the Scientific system of Western medicine, unless the curriculum of the Board conforms to that laid down by the Indian Medical Council or the State Medical Faculty.

During 1940, one practitioner was warned for advertising and four practitioners were asked to express their regrets to the Council for issuing certificates in a casual and unsatisfactory manner. Inquiries were instituted against two practitioners for infamous conduct in a pro fessional respect. The Council also recommended to Government to prosecute one assistant midwife under the Indian Medical Degrees Act

Dental clinics.

21. The dental clinics opened at several district headquarters hospitals have been doing good work under the charge of honorary dentists, but the province needs a well-equipped dental Hospital with modern appliances and with a School of Dentistry attached coupled with an Act for the registration of dentists. The number of dental cases treated during the triennium are noted below :

1938	13,358
1939	19,857
1940	20,206

Leprosy.

22. Leprosy cases were treated on improved modern lines at all hospitals and dispensaries in the province. The number of patients treated during the triennium were 42,360 against 29,441 of the last triennium.

The Leper Asylums in the province are doing good work. With the establishment of a Leper colony at Zammurrudganj, district Fyzabad, much nuisance in the district of Fyzabad particularly at Ayodhya has been removed. Work for the inmates at various asylums was provided in the form of occupational therapy, e.g. gardening, agriculture, vegetable growing etc. Lepers belonging to other provinces and States are not to be treated ordinarily except when their condition is serious or infective. This will help to remove congestion in the asylums. It is

also expected that the burden of the province in looking after vagrant lepers in the streets of cities and towns will be reduced.

At the Leper Asylum, Almora, patients besides their engagement in the occupational therapy, were also allowed to play football on the small playground they prepared themselves. Here the Propaganda Officer, British Empire Leprosy Relief Association Indian Council, visited the asylum and due to his efforts nine clinics committees have been organized.

An effort was also made to establish a central colony of lepers near Hardwar, but as the scheme involved much recurring and non-recurring expenditure, the proposal was dropped by Government.

Post mortem.

23. The number of *post mortem* examination conducted during the triennium was 11,110 against 9,243 in the preceding triennium. A considerable amount of medico-legal work was also undertaken at the King George's Medical College, Lucknow.

The post mortem examinations were held as usual by the Civil Surgeons (both Indian Medical Service and Provincial Medical Service), Provincial Medical Service officers, and Provincial Subordinate Medical Service officers. The number of their examinations during the triennium is shown below :

Civil Surgeons	7,520
Assistant to Civil Surgeons	634
P.M.S. and I.M.D. officers	2,159
P.S.M.S. officers	797
Total ..	11,110

Pathological work.

24. The Provincial Pathologist at the King George's Medical College, Lucknow, has been carrying out as usual pathological tests.

A statement showing the various examinations done free by the Provincial Pathologist to Government, United Provinces is given below :

Year	W. R.	Widal	Blood Culture	Sections	Miscellaneous	Total
1938 ..	4,465	1,029	17	273	62	5,846
1939 ..	5,255	1,158	8	297	75	6,793
1940 ..	5,107	1,287	1	322	90	6,807

Testing of samples.

25. Arrangements for the analysis of medicinal drugs suspected of adulteration have been made with the (1) Public Analyst to Government, United Provinces, (2) Chemical Examiner to Government, United Provinces and Central Provinces, Agra, and (3) Director, Biochemical Standardization Laboratory, Calcutta. Civil Surgeons have been

instructed to send to the Public Analyst and the Chemical Examiner samples of those drugs for which recognized standards exist and which do not require biological standardization. They have been asked to send samples requiring biological standardization to the Director, Biochemical Standardization Laboratory Calcutta. Samples reported to be defective are brought to the notice of the Director of Industries (Stores Purchase Section), United Provinces Cawnpore, with the request to take necessary action against the firms concerned. This arrangement was introduced as a safeguard against defective supplies.

Tuberculosis.

26. The Government T. B. Clinic at Allahabad which is the only provincial institution for the treatment of T. B. cases attracted a fair number of patients as will be seen from the following figures :

Year	Number of cases treated
1938	1,310
1939	1,750
1940	1,819

As this clinic started work only in August, 1936, the comparative figures for the last trieninum are not available.

Cases suffering from T. B. in all forms were visited by the health visitors. The local medical practitioners as well as the Medical Officer of Health, Municipal Board, Allahabad, co-operated fully. Cases suffering from any type of T. B. disease were notified to the Municipality for carrying out house disinfection. The Municipal by-laws lay down a charge of Rs.2 for disinfection fee. Efforts are being made to get this done free for poor patients. The condition of the patients in their admission to the clinic was bad. They were mostly pulmonary T. B., 5 per cent. were in the first stage, 10 per cent. in the second stage and the remaining 85 per cent. third stage. Incidence was heaviest in male patients between 20—30 and females between 10—20. In Muslim families amongst whom this disease is very common, the health visitors stressed the source of danger caused by wearing a veil or (*burka*). Pneumothorax was the main form of treatment. Phrenic avulsions were done in 1938 and 1939 and Divisions of adhesions was introduced in 1940. Gold and Calcium therapy was used in suitable cases.

The Clinic was visited during the year 1940 by His Excellency the Governor of the United Provinces, Dr. Panna Lal, C.I.E., I.C.S., Adviser to His Excellency the Governor of the United Provinces, and the Tuberculosis Commissioner of India, Colonel Sir James Roberts and the Inspector General of Civil Hospitals. The report of the T. B. Com-

missioner of India was not very satisfactory and efforts are being made to put the work on a sounder basis.

The King Edward VII Sanatorium, Bhowali, expanded to some extent. Additions to buildings, e.g. four rooms in the sweepers block, wardboys room to the "D" class ward, compounders' quarters and a block of six rooms each for male patients and servants, repairs to *nala*, drains, etc., were carried out.

Other institutions which get a Government grant-in-aid, viz. Shri Mangla Prasad Sanatorium, Sarnath, Almora Sanatorium, T. B. Hospital, Lucknow, are also doing useful work in checking the spread of the disease and giving relief to infected persons.

From the funds collected through the appeal of Her Excellency Lady Linlithgow, the Vicerine of India, large funds were set apart for starting T. B. clinics on modern lines in various large districts of the province. This work has been entrusted to the United Provinces Tuberculosis Association and the construction of buildings, equipment, etc. of the clinic are being undertaken by them. The headquarters of the Provincial T. B. Association was established in Lucknow in 1939. It is working in co-operation with the Anti-T. B. League. It is at present undertaking a T. B. survey in Lucknow as a preliminary step and up to date 550 persons have been tested by Montoux test. The League devotes its activities on educational propaganda to the literate public and magic lantern demonstrations on the causes and methods of prevention to the illiterate public. Lectures were delivered by the Honorary Propaganda Officer. Leaflets were distributed in Hindi, Urdu and English during fairs and festivals in Lucknow.

Cataract cases.

27. The total number of cataract cases treated during the year 1940, was 3,148 out of which 2,968 operations were successful:

Sadr hospitals	1,976
Branch dispensaries	1,094
Villages	69
Total	3,139

The highest number of operations were done in the districts of Muzaffarnagar, Sitapur, Benares, Basti and Gonda.

Training of compounders.

28. As usual, 90 apprentice compounders were admitted to the compounders training class every year during the triennium, i.e. 15 at each centre.

Mental hospitals.

29. The Mental hospitals in the province have continued to do as much good work as was possible with the limited resources at their disposal. The report on these hospitals is published separately.

Subsidized dispensaries and medical practitioners.

30. The scheme for the expansion of medical relief in rural areas has progressed little during the triennium under report. Five new

subsidized dispensaries were opened. One dispensary in Fyzabad District was closed due to financial stringency. The total number of dispensaries at the close of the triennium was 73 as against 68—of the preceding triennium. Eleven subsidized medical practitioners were settled in rural areas. The number of such practitioners at the end of the triennium was 39 as against 28 of the preceding triennium. Efforts were made to encourage the local bodies to take advantages of the scheme, in which Government shared half the expenditure up to a maximum of Rs.1,312 in the case of subsidized dispensaries, and the pay of the medical practitioner (Rs.600 for a licentiate and Rs.1,000 for a graduate) in case of subsidized medical practitioners. Unfortunately the scheme which is most important has received very poor response from the local bodies.

State hospitals.

31. The State hospitals at Agra, Allahabad, Cawnpore and Roorkee have discharged their duties satisfactorily in treating poor patients, free of cost. Fees are however, charged from well-to-do patients. A scheme for rebuilding the Colvin and Manohar Das Eye Hospital at Allahabad is under the consideration of Government and it is hoped that the new hospital at Allahabad will be constructed as early as possible and will remove the very long felt need for a modern hospital in that city. The Thomason Hospital, Agra, is also to be enlarged as the Medical School, Agra, has been raised to a degree standard for teaching students of the M.B.B.S. class. The question of increased accommodation, and the raising of the grants for diet medicines, instruments and appliances is under consideration. The scheme will prove a costly one.

Divisional and district head quarters hospitals.

32. The question regarding the provincialization of Sadr hospitals could not be taken up owing to continued financial stringency. But the problem for improving the conditions of certain district headquarters hospitals by way of providing medical facilities has, however, been engaging the attention of Government.

Nursing.

33. Nursing facilities in the province are very backward and Government have been approached to sanction the introduction of a nurse training scheme in some of the bigger hospitals in the province both for male and female nurses.

Rural Development dispensaries.

34. Forty-eight fixed and sixteen travelling allopathic dispensaries; and one hundred and forty-six Ayurvedic and fifty Unani dispensaries have been established in rural areas of the province under the Rural Development Programme.

These dispensaries have been run by qualified doctors, *vaids* and *hakims*, duly selected by the Public Service Commission, United Provinces, and are State dispensaries financed direct from provincial revenues. They have rendered services to the villagers. The staff of these dispensaries also carried out public health propaganda and looked after the sanitary improvements in the villages in addition to the dispensaries work. They also helped in anti-epidemic work.

The staff working at each type of dispensary is as noted below:

Fixed allopathic dispensaries:

(1) Medical officer	1
(2) Compounder	1
(3) Sweeper	1
(4) Servant	1

Travelling allopathic dispensaries:

(1) Medical officer	1
(2) Khallasi	1
(3) Disinfectant cooly	1

Ayurvedic or Unani:

(1) Vaid or Hakim	1
(2) Compounder	1
(3) Servant	1

The object of establishing these rural dispensaries was to afford medical relief as far as possible in villages where medical aid was non-existent. These dispensaries did good work with the limited resources at their disposal. Improvements are still needed to provide better facilities for more efficient and up-to-date work by these dispensaries.

Government sanctioned a sum of Rs.17,500 during the year 1939-40 and also a similar amount in the year 1940-41 for the treatment of eye diseases in the United Provinces under the Rural Development Programme. Allotments were made out of these grants to certain district and private hospitals, for providing facilities for the treatment of eye cases. The scheme afforded operation and treatment to the villagers suffering from cataract and other eye diseases. Cataract glasses were distributed free of charge to deserving cases.

35. The hospitals and dispensaries under the Countess of Dufferin's Fund Association continued to work satisfactorily. Their number was 25 but the total number of hospitals affiliated to the United Provinces Branch of the Dufferin's Fund and managed by district and municipal boards, Court of Wards estates and other local societies was 55. **Dufferin's Fund.**

Encouraging work has been done at the dispensaries working under the scheme for the extension of medical relief to women by women in rural areas and small towns. The scheme for improved co-operation between the midwifery services sponsored by the Red Cross Society and the Dufferin's Fund which was approved by Government last year was tried with a certain measure of success at 6 out of 12 units sanctioned under the Revised Rural Area Scheme, there were no Red Cross midwives at the remaining places.

Grants amounting to Rs.14,388-11 were sanctioned during the year for improvements in provincial Dufferin and affiliated zenana hospitals. The Dufferin Council grant of Rs.4,000 for the year was distributed

equally amongst the four larger Dufferin hospitals in the charge of Women's Medical Service Officers for necessary improvements.

The following staff was employed at the various hospitals at the close of the triennium :

(1) W. M. S. officers	8
(2) ,, ,, (training reserve)	4
(3) Assistant surgeons (Selection grade)	6
(4) ,, ,, (Ordinary grade)	22
(5) Women S. A. S.	78
(6) Midwife compounders	9
(7) Matrons and Anglo-Indian Staff nurses	5
(8) Indian Staff nurses	25

The following events are noteworthy :

(1) Lady Hallett, wife of His Excellency the Governor, United Provincial was pleased to accept the Presidentship of the Provincial Committee of the Dufferin Fund.

(2) The foundation stone of the New Dufferin Hospital, Cawnpore, was laid by Lady Hallett in March, 1940. The hospital is being built at a cost of about $2\frac{1}{2}$ lakhs from the handsome donation of Sir Harry and Mr. Albert Horsman of Cawnpore and is expected to be completed shortly.

(3) Government were pleased to sanction a special grant of Rs.13,633 to enable the Provincial Committee to order the reinstatement of the nurse whose services had been dispensed with for the second time from 1st March, 1940, as a measure of economy.

(4) Government allowed the lady S. A. S. employed by the Dufferin Fund to appear for the grade examinations formerly held at the Women's Medical School, Agra, with male medical officers and no fee will be charged.

(5) Liberal grants were also sanctioned by Government towards the maintenance of *zenana* hospitals affiliated to the United Provinces Branch of the Fund. A sum of Rs.30,000 non-recurring and Rs.5,000 recurring was given to the Kamla Nehru Memorial Hospital, Allahabad, in the year 1940-41.

Government took steps against certain local boards for the recovery of their arrear contributions due to the fund for the services of medical women attached to their hospitals and also against one or two boards for discontinuing their contributions towards the working expenses of the local women's hospitals. As the Women's Medical School, Agra, was closed down, no Dufferin scholarship was sanctioned to any candidate.

The income of the fund is derived from three sources; (*i*) Government grant, (*ii*) contributions from District Boards and Municipal Boards, and (*iii*) interest on loans advanced to Court of Wards estates

and investments in Government securities. The income from the first two items is inadequate while from the third it is gradually decreasing due to drastic reduction in the rate of interest on loans advanced to Court of Wards estates from 1st May, 1935, under the provisions of the Encumbered Estates Act. The matter was serious and Government might be impressed with the seriousness of the situation and requested to agree to enhance their grants and contributions either to the level of the average cost or to the actual amount spent and also to sanction a few fresh grants, as well as to press the local boards to pay their contributions for the services of the medical women at the revised rates. This is further being lo6ked into by a sub-committee and its recommendations will be forwarded to Government in due course.

A statement showing the work of the hospitals and dispensaries under the Dufferin Fund is attached as an appendix to this report.

36. The inspection of hospitals was done as usual during the year 1938 and 1939 but in 1940 inspections were curtailed to some extent due to the War and increased work at headquarters. Inspections.

377. The activities of the Medical Department could not be much expanded owing to continued financial stringency. In 1938 and 1939 a sum of Rs.50,000 was provided for assisting those District Boards who were willing to contribute an equal amount from their own resources for providing medicines, equipment etc., to their rural allopathic dispensaries. Many boards took advantage of this scheme. In 1939 a further sum of Rs.1,00,000 was sanctioned for the improvement of medical facilities at hospitals and dispensaries in the province, but in 1940 it was reduced to Rs.20,000. General.

Handsome donations were also received from Messrs. Horsman Brothers of Cawnpore for improving and reconstructing the Cawnpore hospitals both Sadr and Dufferin. A generous donation of Rs.30,000 was received for the establishment of a Heart Clinic, at the Agra Medical College. Seth Matrumal Benara of Agra also contributed a sum of Rs.45,000 for the construction of an Eye Department at the Agra College. Such generous donations and contributions forthcoming certainly improve the conidtions of many of the hospitals. The Medical Department is to a large extent a charitable department and has little resources of its own, and has mostly to depend on Government grants, grants given by Local bodies and donations from the public. The need for money at the present moment is very great both for capital and recurring expenditure especially for the expansion of medical relief in rural areas, improvement of Sadr hospitals, providing extra staff at Mental hospitals and certain major building operations.

38. In conclusion, I desire to thank all medical personnel of the department, who have by their devotion to duty contributed so largely to the successful working of the department during the triennium. My thanks are also due to my Personal Assistant Mr. J. A. Rosemond and Conclusion.

to the Office staff who deserve appreciation for their excellent work in spite of many handicaps.

Finally, I may mention that the services rendered by the local bodies and non-official organizations such as British Empire Leprosy Relief Association, United Provinces Branch, T. B. Association, United Provinces British Red Cross Society, Dufferin's Fund, St. John Ambulance Association, United Provinces Branch, were of great help to me and I take this opportunity of thanking them.

I have the honour to be,

SIR,

Your most obedient servant,

T. C. BOYD,

COLONEL, I.M.S.,

Inspector General of Civil Hospitals,

United Provinces.
